

## MANAGING CLIMATE RISK FOR THE ENERGY AND WATER INDUSTRIES

The World Energy & Meteorology Council and the University of East Anglia are pleased to invite you to join us for an evening event, to introduce our EU H2020 project, Seasonal Climate Forecasting for Integrated Risk Management (SECLI-FIRM).

The event will be held in the **La Fontaine Suite at Dunston Hall, Norwich, from 7.00pm to 9.00pm on Wednesday 18 September 2019**. A hot buffet will be provided.

### What is SECLI-FIRM?

The project focuses on how long-term seasonal forecasting can help the energy and water industries with decision-making and risk management.

Through a series of case studies created with industry partners, including Shell, National Grid, Thames Water, the Met Office and ENEL, the project

team aims to show how the latest seasonal forecasting methods can be practically applied to real-life management decisions, saving organisations time and money.

This exclusive event offers attendees the opportunity to learn about SECLI-FIRM and meet with climate science and energy experts from the project and our industry partners. To find out more about the project, watch our [introductory video](#) or view our industry [case studies](#).

We hope you can join us for what promises to be an interesting and informative evening. **Please RSVP to [a.troccoli@uea.ac.uk](mailto:a.troccoli@uea.ac.uk)**

If you're unable to attend, please let us know if you'd like to nominate a colleague to attend in your place.

Best wishes,

**Prof. Alberto Troccoli**, SECLI-FIRM Project Lead
