

Case Studies, Stakeholder Workshop, & more

The past few months have been busy for the SECLI-FIRM project team members, and it doesn't look to be slowing down.

In this newsletter you'll find out about our next event, how our first webinar went, new information from our case studies, and some new WEMC tools you can explore with a few clicks of your mouse.

CASE STUDIES NOW UPDATED

Refreshed with the most up-to-date information available from each of our project partners, these latest Case Study Flyers are full of fresh information, new data and our next steps. [Download the flyers >](#)

STAKEHOLDER WORKSHOP

Join us and learn about the seasonal forecast science, the decision making and the trial climate services being developed by the SECLI-FIRM project for the energy and water industries. Registration is [FREE](#)

DISCOVER CASE STUDY 1

This [case study](#) explores how extreme climatic events, such as heatwaves, affect energy generation. And how the SECLI-FIRM project could help improve seasonal forecasts and risk management for these events. [Watch the video >](#)

WATCH OUR FIRST WEBINAR

In January we hosted our first ever SECLI-FIRM **webinar!** With talks from Project Lead, Alberto Troccoli, and Project Partner, Clare Goodness, it offered a brilliant starting point to [understand and explore the project >](#)

Get educated on Climate Change

Discover WEMC's new smart data visualization tool. The [C3S Education Demonstrator](#) works with school curricula, and with global climate change and energy goals, to engage the youth of today. [Find out more >](#)

The SECLI-FIRM project has received funding from the European Union's Horizon 2020 Research and Innovation Program under Grant Agreement 776868.
